## 1984 Summary

Over the course of the 1984 summer, 4.9 million people visited sites in our provincial recreation system; an increase of 6% over the 1983 season. Although visitation calculated from vehicle entries monitored throughout the province has increased, individual site fluctuations are apparent, and statistics were generated for two additional sites over the 1983 season. Visitations to provincial parks was up 2% over 1983, with just over 2.4 million visitors during the 1984 summer season. Katepwa Point, Echo Valley, Buffalo Pound and Moose Mountain Provincial Parks showed the largest increases in visitation, respectively.

Total entry permits issued decreased by 1.2% this season. This decrease was due to the deletion of entry fees for Trans-Canada Highway campgrounds in 1984.

Camper-days increased by 5% throughout the camping system.

The reserve-a-site camping program was in its second year of operation in 1984 and comparative statistics indicate 32% more permits issued, 37% more permit-days, 35% more campers and 44% more camper-days than 1983. The average length of stay for campers using the campsite reservation program is 4.4 days compared to 2.0 days for those not using the system.

Seventy-three percent of all campers in 1984 were Saskatchewan residents, followed by Albertans at 15%. The average size of the camper group was 3.4 people and the tent trailer appears to be the most popular type of camping equipment (35.6%), followed by cabin trailer, and motorhomes, 18.4% and 16.1%, respectively.

In 1983/84, winter recreation programs were promoted in our provincial parks. With increased winter visitation to our parks, participants in winter programs during the 1983/84 winter season numbered nearly 12,000.

Summer programs offered in our parks have led to significant increase in recreational, aquatic and interpretive programs participation. Over the past three years there has been a 28% increase in summer park program participation. The 1984 summer season generated participation by more than 80,000 park visitors in hundreds of structured programs such as crafts, campfires, swim lessons, tours, films, nature hikes, special events and many more.

Approximately 71,000 golf tickets were issued during the 1984 season, an increase of 9% over 1983. Greenwater and Valley Centre golf courses showed the largest increase in golf tickets issued. Moose Mountain Provincial Park, however, continues to be the most utilized course in our park system with nearly 16,500 tickets issued, an increase of 2% over 1983.

Rental accommodation occupancy rates for the summer months was highest at Greenwater (77%). Summer season occupancy for Cypress Hills (72%), Duck Mountain (70%) and Moose Mountain (69%).

Downhill skiers utilizing department operated ski hills decreased 12% in the 1983/84 season. However, this decrease was due to a one-month reduction in the operating season (31 skier days less than the previous season).
